Thinkfinity Grant Interim Report

Gregory Colman
Associate Professor
Department of Economics
Dyson College

The purpose of the grant proposal for Thinkfinity funds was to improve the teaching of econometrics at Pace University by making available to students and professors the computer program most widely used in econometrics, Stata. The plan was, first, to buy 100 licenses for use by students in the computer laboratories as well as to buy copies for the four professors in the Economics department who teach or advise students in econometrics. Second, the three professors with no experience in the program would learn it. Third, the Economics department would use Stata in our econometrics courses as well as in Eco 400, a course in research methods.

All of these goals have been achieved. The purchasing order used in buying the materials from Stata is shown in Attachment 1. Stata's shipping order is Attachment 2. For some reason the materials were originally shipped to Joe Seijo in Pleasantville, but this was no problem, since Joe immediately sent them to me. I then gave two Stata DVDs to the Computer Resource Department (see Attachment 3), where Alfred Samala installed the program on the computers in the computer labs. Further, four of us in the Economics department have installed Stata on our computers, and three are taking web-based courses from Stata on using the program. Finally, we are teaching Stata in Eco 400, which has just started.

One part of the original plan has changed. In February, when we obtained the Thinkfinity funds we bought the current version of the program, 10. In July, version 11 came out. Stata generously allowed me to upgrade to the newest version for the difference in their prices, which I paid out of pocket (Attachment 4.). The Computer Resource Center has since installed the new version in the computer labs.

SUPPLIER INFORMATION:

Supplier Name: StataCorp LP

Supplier Address: 4905 Lakeway Drive
College Station, Texas 77845
_____
_____

Supplier Phone#: 800-782-8272

Supplier Fax#: 979-696-4601

ITEM INFORMATION:

Item Name / Software Name: 50-user Stata/IC 10 Lab Windows 32-bit

Item #: _____

Description of item: 50 licenses to use Stata (the IC version) in a computer
lab. That is, 50 students can use the program at the same
time.
_____

Qty/# of Licenses: 50

Individual Price: \$4,550.00

Total Price: \$4,550.00

ITEM INFORMATION:

Item Name / Software Name: 50-user Stata/IC 10 Lab Windows 32-bit

Item #: _____

Description of item: Same as above. We need 100 licenses.
_____

Qty/# of Licenses: 50

Individual Price: \$4,550

Total Price: \$4,550

ITEM INFORMATION:

Item Name / Software Name: 4 single-user Stata/SE 10 licenses Windows 32-bit

Item #: _____

Description of item: 4 licenses to be used by the professors with single-processor computers. These must be separate licenses from those above.

Qty/# of Licenses: 4

Individual Price: \$985 for the first, \$440 for the second, \$390 for the third and fourth.

Total Price: \$2,205

ITEM INFORMATION:

Item Name / Software Name: 1 single-user Stata/MP 10 license Windows 64-bit x86

Item #: _____

Description of item: 1 license for a multi-processor computer. The "MP" above refers to "multi-processor".

Qty/# of Licenses: 1

Individual Price: \$2,145.00

Total Price: \$2,145.00

ITEM INFORMATION:

Item Name / Software Name: Base Documentation Set for Windows

Item #: _____

Description of item: These are the manuals that explain how to use the program.

Qty/# of Licenses: 2

Individual Price: \$300

Total Price: \$600

ITEM INFORMATION:

Item Name / Software Name: Stat/Transfer 5-user Workgroup for Windows

Item #: _____

Description of item: This program converts data sets created by other programs, such as SAS, to Stata data sets.

Qty/# of Licenses: 1

Individual Price: \$595

Total Price: \$595

OTHER:

Quote# The total cost of the above items is \$14,645. According to Stata's website, the shipping is \$123.30, so the total cost is 14,768.30
