# Federal Environmental Statutes

KEVIN MADONNA\*

The following list of federal environmental laws was compiled over a six month period, as part of a Pace University School of Law research project. Any compilation this size is inherently subjective. Thus, I do not claim that every law affecting the environment has been listed. However, the list does cover all of the major federal environmental laws, as well as a number of other laws that have a significant effect on the environment. Because the United States Code (U.S.C.) cites may change over time, all titles are accompanied by their public law numbers, which remain constant. To locate a U.S.C. cite, simply look up the public law number in Statutes at Large.
