Introduction

The increasing number of barbaric attacks carried out by the Islamic State of Iraq and Syria (“ISIS”) against the innocent, and its resulting war crimes, genocide, and crimes against humanity must be addressed by the international community.¹ But another series of horrific events in arguably the most important Arab country—Egypt—also require international attention and call into question the United States’ and the West’s policies and practices in the Middle East and in the Islamic world generally.² By refusing to cut off military aid to the Egyptian military regime after it overthrew its first fairly elected President in 2013³ and by continuing massive

military aid⁴ despite the regime's violent repression of mostly peaceful Muslim Brotherhood protesters, the United States demonstrates that its leaders have still failed to recognize the likely origin of September 11.

A better understanding of the causes underlying terrorist violence against the United States may help policy makers resort less to military force and more to peaceful, diplomatic approaches.⁵ A fairly detailed recounting of the history of Egypt, particularly its interface with the West, is required to gain a firmer grasp of the challenge that confronts the West generally and the United States in particular. The history of Egypt's interaction with the West is emblematic of the West's interaction with Islam. What, unfortunately, is usually left out of Western discussions of Islamic terrorism is that nearly every Muslim country was colonized by Russia⁶ or Western European nations.⁷ This colonization had, among others, the perverse effects both of thrusting autocratic military leaders into power and of galvanizing extremist exponents of Islam. Following colonization, other repressive secular rulers arose in Islamic countries including Egypt, leaders who likewise sparked an extremist reaction from Islam's fundamentalist strain.⁸ In general, the United States and other Western countries have supported these authoritarian secular leaders. The Arab Spring attempted to create a third way, but largely fell victim to entrenched

repressive military forces.⁹

Faced with the threat of extremist violence, the United States and its allies may, however, draw upon revolutionary developments in international law since the end of World War II to help fashion a sounder counter-terrorism policy and practice. Part I of this article examines the troubling history of Egypt's encounter with the West. Part II discusses United States' approach to Egypt and to the Middle East generally. Part III reviews the Arab Spring, the Egyptian coup, and its aftermath. Part IV analyzes international law prohibiting coups d'état, political repression, colonization, conquest, and systematic racial and religious discrimination. Lastly, Part V critiques the United States' response to the coup and argues that Western states and Russia have a moral, if not absolutely legal, obligation both (a) to make reparation to all the peoples in the Middle East, and to the Islamic world generally and (b) to foster the rule of law, human rights, and democratic institutions in all those states. An effective and principled counter-terrorism policy and practice require no less.¹⁰

I. Conquest and Colonization of Egypt

A. Early History

Egypt had been a Muslim country since 641 CE.¹¹ The army of Sultan Selim brought Egypt into the Ottoman Empire after defeating the ruling Mamluks outside Cairo in 1517.¹² In 1798, Egypt, however, was conquered by Napoleon.¹³ Napoleon's conquest was short-lived; the Ottoman Turks and the British banded together and pushed the French out in 1801.¹⁴ One of the Turkish officers,

Muhammad Ali (also known as Mehemet Ali), became the ruler of Egypt.¹⁵ He defeated the British in 1807, brutally confiscated the lands of rival feudal lords, persuaded the Ottoman Sultan to name him viceroy, and, of all Muslim leaders in the nineteenth century, did the most to modernize his adopted country along European lines.¹⁶ He ruthlessly impressed the peasantry into the army and into his textile mills.¹⁷ He also excluded the Muslim clergy, the ulama, from avenues of power.¹⁸

Muhammad Ali gained Egypt's *de facto* independence from the Ottoman Empire, an independence that displeased Britain.¹⁹ One of Ali's military campaigns threatened Constantinople.²⁰ Britain and France supported the Ottoman Empire in fending off the attack and in defeating Ali.²¹ Under the terms of the Treaty of London of 1841, Ali had to give up Syria, limit his army to 18,000 troops, and ease his tariffs on British imports, an act that contributed to the failure of his efforts to establish Egyptian manufacturing.²²

Said Pasha, Muhammad Ali's son, began his nine-year rule in 1854.²³ Wanting to continue the modernization of Egypt, he gave

French diplomat and engineer Ferdinand de Lesseps the concession to build the Suez Canal.²⁴ Financed by French, Egyptian, Spanish, and neighboring countries' investors, the de Lesseps' Suez Canal Company started construction.²⁵ Using the forced labor of thousands of Egyptian peasants, the Company completed the Canal nearly eleven years later at twice the estimated cost.²⁶ When the Company ran into financial trouble, Said Pasha bought forty-four percent of its stock and also ran the government into debt.²⁷

Said's successor, Ismail spent far beyond his and his country's means, nearly bankrupting Egypt and permitting it to fall largely into the hands of French and British creditors.²⁸ In 1875, the dire financial situation virtually compelled the government to sell its shares in the Canal to Britain.²⁹ The French and English governments urged Ismail to abdicate in favor of his son Toufik.³⁰ When the Ottoman Sultan agreed, Ismail was deposed, and Toufik, at 27, became the viceroy of Egypt.³¹

Toufik did not reign independently for long. A charismatic officer, Said Ahmed Urabi, led an army revolt in 1881 and became the military ruler of the country.³² Urabi set to work wresting internal control of Egypt from the French and the British, and called for the expulsion of foreigners.³³ His policies alarmed the two

European powers.³⁴

Although initially opposed to the Canal's construction, the British considered the completed Suez Canal vital to their interests as "the highway to India."³⁵ Concerned that Urabi's revolt might threaten their access to the Canal, the British invaded Egypt in 1882, beat Urabi's troops with superior firepower, captured Urabi, and reinstated Toufik.³⁶ For the next seventy-two years, the British retained *de facto* if not *de jure* control of the country.³⁷ Specifically, the British occupied Egypt, but permitted the Egyptian viceroy to exercise nominal authority.³⁸ At the outbreak of the First World War, the British appointed their own sultan of Egypt, establishing a protectorate that lasted until shortly after that war.³⁹ After the protectorate ended, authority was supposedly passed to Egypt's monarchy (Ali's heir), but real power lay with the British who continued to station large troop contingents in Egypt until 1954.⁴⁰

The colonization of Egypt had practical effects, for example, changing a diverse economy into a single commodity enterprise.⁴¹ Four-fifths of Egyptian cotton now went directly to

British textile mills.⁴² Some aspects of European colonization were particularly humiliating to Egyptians. For example, they were blatantly discriminated against in employment contracts.⁴³ Furthermore, under a seventeenth-century agreement between the Ottoman Sultan and the French that ultimately applied to all Europeans, the Egyptian government had no authority to apply its laws to Europeans living in Egypt.⁴⁴ Known as the Capitulations, this set of laws and practices enabled the Europeans to act with impunity in committing crimes and civil wrongs.⁴⁵

After the First World War, representatives of the Egyptian people contested Britain's holding onto Egypt.⁴⁶ Several U.S. members of Congress and President Woodrow Wilson himself criticized colonization and specifically the British colonization of that country.⁴⁷ Britain and France successfully resisted all such demands.⁴⁸ Both the peace treaties between the Allies and Turkey (representing the Ottoman Empire) and the League of Nations parceled out the Empire mainly between the British and the French.⁴⁹

The creation of the mandate system in the former Ottoman Empire outraged the Arab population living in many of these lands.⁵⁰ Instead of freedom and self-government, the Arabs received another brand of colonial rule.⁵¹ Only Turkey had the military strength to reject the initial peace Treaty of Sèvres.⁵² Upon Kemal Ataturk's overthrow of the Ottoman Sultan (the Caliph)⁵³ and his imposition of secular rule, the Allies agreed to Ataturk's demands to retract the Treaty of Sèvres, thereby expanding Turkey's borders and eliminating the new Armenian state and Kurdistan autonomy.⁵⁴ In his zeal to establish a modern, democratic Turkey, Kemel Ataturk also persuaded the Turkish Parliament to abolish the Caliphate in 1924.⁵⁵ Although most Muslims frequently disagreed with the Caliph and his practice of bowing to Western powers, the abolition of the religious head for Muslims was somewhat like abolishing the papacy would be for Catholics.⁵⁶ The abolition caused dismay throughout the Muslim world, leaving Muslims feeling adrift.⁵⁷

Between the two world wars, nationalism in Egypt and much of the Middle East was ascendant, but little progress toward ending English domination was made.⁵⁸ Immediately after World War I, Britain arrested Egyptian nationalists, violently put down the ensuing revolt,⁵⁹ and rejected their demands for independence.⁶⁰ The breakup of the Ottoman Empire and the abolition of the Caliphate devastated much of the Arab and Muslim worlds, both economically and culturally.⁶¹ In a sense, the breakup was like creating the European Union in reverse. What had been a single, though somewhat loosely bound, empire, overnight became a group of new states (or at least new separately designated colonies or protectorates).⁶² Each of the newly created Arab or Muslim states all at once had foreign borders; each had its own customs and taxes.⁶³ Former Ottoman Empire provinces that had little to do with one another were cobbled together to form a country (for example, Iraq was formed from three provinces of the Ottoman Empire—Mosul, Bagdad, and Basra).⁶⁴ Others, like Transjordan, were created because of squabbles between France and Britain over Syria.⁶⁵ Fragmenting the Ottoman Empire weakened the whole, which was France and Britain's objective.⁶⁶ Only Turkey's military might and its drastic drive towards modernity enabled it to escape

The 1936 Anglo-British Treaty, though nominally ending British occupation of Egypt,⁶⁸ allowed Britain to station 10,000 additional British troops in the Canal Zone.⁶⁹ “With the advent of the Second World War, Britain effectively occupied the country again.”⁷⁰

B. The Rise of Nasser—the Secular, Authoritarian Military Leader

As disappointment continued to sweep through the Arab World after the Second World War, all parts of the Egyptian population were agitating against British rule.⁷¹ Although the British had left the rest of Egypt largely alone, Britain stationed 80,000 troops in the Canal Zone.⁷² In January 1952, when the British used heavy weapons against the light-armed Egyptian police, there was a national outcry.⁷³

the international community,⁹¹ France and Britain backed down.⁹² The Israeli forces moved back from the Sinai.⁹³

The two colonial powers lost, and, even though his army was defeated, Nasser became a hero in the non-aligned world.⁹⁴ At least one commentator attributes the brisk pace of worldwide decolonization after the “Suez Affair” to the success of Nasser in nationalizing a primarily European-owned company and to the defeat of France and Britain in their attempts to retake the Canal.⁹⁵

In the 1960s, Nasser (and other Arab leaders), increasingly made threats to Israel.⁹⁶ Nasser also took threatening actions. On May 15, 1967, he began to mobilize his military forces and started putting them in the Sinai; he asked the U.N. Emergency Force to pull out and stop patrolling the Egypt-Israeli border; he closed the Strait of Tiran to Israeli ships; and he “talked openly” of attacking and destroying Israel.⁹⁷ Israeli leaders agreed to negotiate, but the Arab leaders refused to do so.⁹⁸ Faced with the provocative

¹⁰⁰ Although not expressly authorized under article 51 of the UN Charter, a preemptive attack is probably justifiable under customary international law in narrow circumstances. C. *The Rise of al-Banna and the Muslim Brotherhood*

The British colonization of Egypt had provoked not only secular Egyptian nationalists, but also Islamic fundamentalists.¹⁰¹ In 1919, the then-thirteen-year-old Hasan al-Banna participated in the Egyptian uprising against the British.¹⁰² He grew to become a religious and nationalist leader.¹⁰³ The First World War and its aftermath affected al-Banna and helped create the movement he led:¹⁰⁴

After the World War I, Turkey abandoned the Caliphate, discarded the Arabic alphabet, and carried out extensive reforms. These things had profound repercussions in Egypt. The Liberals seized this opportunity to issue literature on Egypt's relations with the West, the substitution of the Western hat for the fez, the emancipation of women, freedom of thought, and the like. On the other hand, the Conservatives held these to be a departure from the fold of Islam, the message of the Koran, the name of the Caliphate, and religion in its totality. It was their opinion that Egypt had become the headquarters of the Islamic mission, the field of its struggle, and the legal heir of its leadership. Al-Banna was among those of the latter party.¹⁰⁵

In 1928, in Ismailia, Egypt, al-Banna founded the Muslim Brotherhood.¹⁰⁶ A gifted speaker and organizer, al-Banna built the

society into one of the most formidable organizations in Egypt, if not the Arab world.¹⁰⁷ At its height, in the 1940s, the Muslim Brotherhood had over 500,000 registered members.¹⁰⁸ The Brotherhood ran schools, health clinics, religious classes, other services, and also developed a clandestine military arm.¹⁰⁹

In 1948, five weeks after declaring the Muslim Brotherhood illegal, the Egyptian prime minister was assassinated by a Muslim Brotherhood member.¹¹⁰ This murder led to the assassination of the forty-three-year-old al-Banna the following year, probably by an Egyptian government agent.¹¹¹

The Muslim Brotherhood was the forerunner of those contemporary Arab-Muslim groups, including al-Qaeda and ISIS, which have targeted the West for violence.¹¹² After al-Banna's assassination, Sayyid al-Qutb became the Brotherhood's philosophical and theological prophet as well as one of the organization's leaders.¹¹³ A skilled writer and deep thinker, al-Qutb went far beyond al-Banna and called not only for a Muslim state and for the recovery of all territory once under Muslim control, but also for world conquest and the imposition of Islam as the official world government and as the sole religion for all peoples of the world.¹¹⁴ After studying for a postgraduate degree at Colorado State College of Education (now University of Northern Colorado) from 1948 to 1951, al-Qutb returned to Egypt with a special antipathy towards the United States, its culture, and its people.¹¹⁵

Al-Qutb and the Muslim Brotherhood had crossed paths with the new government since the Free Officers' successful liberation of Egypt from Britain in 1952.¹¹⁶ Although initially supporting the government, the Muslim Brotherhood soon stood at odds with Nasser's secular state.¹¹⁷ Some members of the Muslim Brotherhood engaged in violence against state officials, including at least one assassination attempt against Nasser in 1954, which led to the Brotherhood's "forcible suppression."¹¹⁸ Although al-Qutb did not directly take part in such violence, he was tortured and imprisoned for many years.¹¹⁹ He was subsequently accused of plotting against the State and against its president.¹²⁰ Nasser had him executed in 1966, elevating al-Qutb to martyrdom status in the eyes of Islamic fundamentalists.¹²¹ Al-Qutb's philosophical writings have become the holy writ of today's Muslim fundamentalist movements.¹²² He is said to have inspired Osama bin Laden¹²³ and Ayman al-Zawahiri.¹²⁴

Egypt.¹²⁵ Islamic fundamentalists held relatively little power.¹²⁶ The Israeli success in the 1967 War (also called the Six Day War), however, had a devastating impact on the secular Arab governments.¹²⁷ They were discredited in the eyes of their people.¹²⁸ Because of the failure of these governments vis-à-vis Israel, domestically, the pendulum began to swing away from the secular modernizing governments epitomized by Nasser, and by the Shah of Iran, to the “conservative” Muslim fundamentalists, epitomized by the Muslim Brotherhood.¹²⁹ There is a competition going on in the Islamic world between the “conservative” fundamentalists and the “liberal” modern secularists.¹³⁰ From 1967 to 2011, we probably witnessed the rise of fundamentalism in the Muslim world, with the possible exception of Iran.¹³¹ There, actual experience of living under an Islamic state fueled an active opposition, which, has not yet become strong enough to displace the mullahs.¹³² The Arab

The relative "openness" under Sadat allowed the Muslim Brotherhood to reestablish itself.¹⁴⁴ Sadat, however, imprisoned and, in some cases, tortured extremists from both the left and the right.¹⁴⁵ In 1981, he arrested "over 1,500 religious militants," a move that outraged the fundamentalist opposition.¹⁴⁶ Although generally popular in Egypt, Sadat had been reviled by Muslim fundamentalists, such as the Muslim Brotherhood, Egyptian Islamic Jihad ("al Jihad"), and the Gamaa al Islamiya ("GIA").¹⁴⁷ At this time, al Jihad and GIA "broke from the Muslim Brotherhood, specifically because the Brotherhood had now refused to consider the use of violence."¹⁴⁸ These Islamic fundamentalist organizations

II. The United States, Egypt, and the Middle East

A. *The United States Assumes the Mantle of a Colonial Power.*

The United States never colonized a Muslim nation.¹⁵⁹ But it gradually assumed—at least for Muslims—the mantle of colonization over the Middle East, particularly after the Second World War.¹⁶⁰ The United States showed relatively little interest in the Middle East until American oil executives discovered oil in Bahrain and Kuwait in the 1930s.¹⁶¹ From the end of the Second World War to the end of the Cold War in 1990, the concerns that drove United States’ policies in the Middle East region included ensuring the supply of oil, supporting Israel,¹⁶² and containing communism.¹⁶³ To guarantee that oil is readily available,¹⁶⁴ the

¹⁶² Jones, *supra* note 160, at 208. Muslims were not the only parties in the Middle East who suffered from conquest, colonization, and discrimination. The United States’ policy toward Israel stems in part from Russia’s and the Christian West’s attitudes and conduct toward the Jewish people. The Christian West has practiced systematic discrimination against Jews for over 2000 years (and the Russians have done so for at least a millennium). A full discussion of the West’s invidious and genocidal discrimination against the Jewish people as well as the creation of the modern state of Israel is beyond the scope of this article. For an enumeration of discriminatory and genocidal treatment of the Jews throughout history, see MCDONNELL, *supra* note 7, at 14–16 (documenting the historical persecution of Jews).

B. *The Perceived Communist Threat*

From the onset of the Cold War, the United States had been determined to stem the tide of communism.¹⁶⁹ In this fierce clash, the United States moved aggressively to ensure that the Soviet Union would not extend its influence in the Middle East.¹⁷⁰ “Among other things, the United States engineered the coup in 1953 against the elected Prime Minister of Iran, Muhammad Mossadegh, because of largely unsupported claims that he was leaning towards the communists.¹⁷¹ In 1963, the CIA again engineered a coup in Iraq, ousting communist-leaning General Abdel Karim Kassem and putting in his place Abu Salam Arif of the Ba’ath Party in 1963.¹⁷² That ouster ultimately led to Saddam Hussein taking control of the country.¹⁷³

When the United States refused to finance the Aswan Dam because Nasser had purchased military equipment from Czechoslovakia—then a Soviet satellite—Nasser turned to the U.S.S.R.¹⁷⁴ Nasser’s turn to the communist bloc led the United States to work against him.¹⁷⁵

The Islamic revolution in Iran upset the order that the United States helped establish.¹⁷⁶ The U.S. support for Saddam Hussein’s war against Iran can be seen, to a certain extent, to fall within this context.¹⁷⁷ The next major cleavage arose when Saddam Hussein invaded Kuwait. No longer considered a reliable U.S. partner, Saddam Hussein was attacked by a broad coalition led by the United

States.¹⁷⁸ Significantly, the repressive House of Saud requested that the United States post standing troops in Saudi Arabia as a protection force against Iraq. At one point, half a million U.S. troops were stationed on the ground in the country containing the two holiest places in Islam, Mecca and Medina.¹⁷⁹

All these policies and practices of the United States were not lost on Arabs and Muslims. With the end of the Cold War, the counterweight to the United States, Russia, was a far less significant presence in the Middle East than the former Soviet Union had been.¹⁸⁰ The United States had now taken the step of actually stationing troops in the holiest land of Islam.¹⁸¹ Osama bin Laden's first fatwa, in 1996, was entitled, "Declaration of Jihad against the Americans Occupying the Land of the Two Holy Places."¹⁸² The invasion of Afghanistan, and even more importantly the 2003 invasion of Iraq, further underscored, in Muslim eyes, the United

Reading Osama bin Laden's writings, one gets the clear impression that his holy war against the United States and against all Americans was triggered more by the stationing of troops in Saudi Arabia than by U.S. support of Israel; he does, however, characterize the "enemy" as the "American-Israeli alliance." MCDONNELL, *supra* note 7, at 16. The British support of Abdul Aziz ibn-Saud during World War I likewise helped him emerge as the ruler of Saudi Arabia. SCOTT ANDERSON, LAWRENCE IN ARABIA: WAR, DECEIT, IMPERIAL FOLLY AND THE MAKING OF THE MODERN MIDDLE EAST 165 (2013). Thomas Edward Lawrence (Lawrence of Arabia) argued that despite posing as Islamic reformists "'with all the narrow minded bigotry of the puritan,' ibn-Saud and his Wahhabists were hardly representative of Islam [but] . . . marginal medievalists, 'and if it prevailed, we would have in place of the tolerant, rather comfortable Islam of Mecca and Damascus, the fanaticism of Nejd . . . intensified and swollen by success.'" *Id.* at 173. Because of their oil wealth, the House of Saud has helped Wahhabism spread throughout the world and has contributed both to the growth of al-Qaeda and ISIS. III. The Arab Spring, the Military Coup d'État, and the Following Repression

A. *The Disappointing Outcome of the Arab Spring*

The Arab Spring swept through the Middle East on January 25, 2011, sparked by the self-immolation of a young street vendor fed up with both the harshness and pettiness of the Tunisian largely one party regime.¹⁸⁴ The ensuing massive protest unexpectedly resulted in the Tunisian military dictator falling.¹⁸⁵ Egypt, Libya, Syria, Bahrain, and Yemen followed, with massive protests of their own.¹⁸⁶ Led by young secularists seeking modern democracies more or less on European lines (or at least Turkish ones), the Arab Spring has borne some good, but much bitter fruit.

Tunisia has established a developing democratic government.¹⁸⁷

Bahrain, however, imprisoned hundreds of peaceful protesters and their leaders.¹⁸⁸ Libya's long-time dictatorial and mercurial leader Muammar el-Qaddafi had his forces gun down peaceful protesters, ultimately leading to U.N. Security Council intervention, Qaddafi's death and downfall, and to continued turmoil.¹⁸⁹ Yemenis brought down their dictatorial president, Ali Abdullah Saleh, but have been thrown into chaos.¹⁹⁰ Syria's al-Assad brutally used military force against peaceful protesters, ultimately pushing the country into a bloody civil war, attacking the so-called moderate Free Syrian Army, initially leaving ISIS largely untouched, and helping them to control vast territory.¹⁹¹ Egypt yet again experienced a more unique cycling from military dictatorship to freely elected civilian rule back to what is essentially a military dictatorship. It is this last country on which this article concentrates.

C. *The Egyptian Elections Stemming From the Arab Spring*

The Presidential and Parliamentary elections that followed Mubarak's resignation, unfortunately, reflect the consequences of decades of dictatorial rule. For most of Egypt's history, including the years following the Officers Revolt of 1952, opposition political parties had been banned, dissent had been prohibited, and the press and other electronic media had been reined in.²⁰⁶ The only effective opposing political organization during the rule of Nasser, Sadat, and Mubarak was the Muslim Brotherhood.²⁰⁷ Although under Mubarak the Muslim Brotherhood had to put up nominally "independent" candidates for public office,²⁰⁸ the Brotherhood knew how to run political campaigns, had years of practice doing so, and were successful in getting their followers out to vote.²⁰⁹

On the other hand, the young secular leaders of Egypt's Arab Spring had no such experience, had no long standing organization behind them, and had less ability to assure that their followers would make it to the polls.²¹⁰ Furthermore, the main opponent to Muhammad Morsi, the Muslim Brotherhood candidate, was Ahmed Shafik, a former prime minister in the widely despised Mubarak regime.²¹¹ Consequently, a significant number of the secularists never turned out to vote.²¹² So although the young secularists led the Arab Spring and were more responsible for deposing Mubarak than any other political group,²¹³ the Muslim Brotherhood ended up winning the first presidential election.²¹⁴ The Muslim Brotherhood also polled well in the upper house of parliament (the Shura Council) and achieved close to a majority in the lower house (the People's Assembly).²¹⁵

From the Brotherhood's point of view, this was a well-deserved victory. They had been participating in essentially a rigged electoral process under the Mubarak regime for decades.²¹⁶ After years of effort and after seeing so many of their candidates fraudulently denied public office,²¹⁷ many of their members carted off to jail, and some to Mubarak's torture chambers,²¹⁸ the Muslim Brotherhood won on both the executive and legislative levels.²¹⁹

Yet the quality of their organization rather than the quality of their ideas probably led the Muslim Brotherhood to victory. Had the secularists a similar organization and party behind them and a different candidate to vote for, the result could very well have been different.²²⁰ Nevertheless, the Brotherhood did what many other political parties in their situation probably would do. President Morsi and his party proceeded to make a grab for power. They had the Brotherhood-dominated Parliament dictate an Islamist-oriented constitution to lock in their control. Committed under SCAF*

After Mubarak resigned but before the presidential and parliamentary elections, the Supreme Command of the Armed Forces (“SCAF”) took over executive powers.²²³ Two days before the runoff in the 2012 presidential election, Egypt’s Supreme Constitutional Court, made up of all Mubarak appointees, dissolved Egypt’s first democratically elected house of parliament in which the Muslim Brotherhood together with other Islamic representatives had achieved a majority.²²⁴ The court also invalidated a parliament

²²² President Morsi’s constitutional decree states as follows:

[T]he Constitutional Declaration, laws and decrees issued by the president from June 30, 2012 until the constitution comes into effect and a new People’s Assembly is elected will be final and self-executing, and *not subject to legal challenge in any way or before any party*. statute that prohibited senior Mubarak era officials from running for high office.²²⁵ A large number of Egyptians “suspected that SCAF had improperly meddled with the court’s deliberations.”²²⁶ The court’s decision had the effect of leaving legislative power in the hands of the military (which had already possessed executive power pending the election).²²⁷ According to the New York Times, “Many analysts and activists feared the decision was a step toward re-establishing a military-backed autocracy.”²²⁸ One scholar likewise criticized the court:

The final yet no less troubling aspect of the decisions is that the SCC [Supreme Constitutional Court] looks as if it has done the full political bidding of the Ancien Régime. It finds its references in the military rulers ‘constitutional declarations’, it dissolves a seemingly adverse Parliament on grounds of inequality that miss[es] the forest for the trees, and it allows a former pillar of the Mubarak regime to go unchallenged.²²⁹

Aside from suspected complicity in that court’s decision, the SCAF committed serious human rights violations, routinely using excessive force against civilians, arresting a large number of civilians on political grounds, subjecting them to military trials, and torturing or otherwise ill-treating a large number of prisoners.²³⁰

E. Human Rights Violations under the Morsi Administration

President Morsi's assuming office was also accompanied by human rights violations.²³¹ In January 2013, there were violent clashes in Port Said, leaving over forty protesters dead, most at the hands of the Security Forces.²³² Instead of calling for an investigation, President Morsi, presumably trying to curry favor with the military and the other security forces, essentially made them immune from prosecution or any other disciplinary action.²³³ The Constitution that he and the Brotherhood rushed through parliament failed to respect woman's rights or the rights of religious minorities.²³⁴ The Islamic dominated parliament also attempted to

In addition, some Muslim Brotherhood members engaged in violence against their political opponents.²³⁷ Some riots and protests turned bloody. Human Rights Watch (“HRW”) noted that Muslim Brotherhood members detained forty-nine anti-Morsi protesters outside the presidential palace on December 5, 2012.²³⁸ The Egyptian Security Forces failed to intervene. These detentions “followed armed clashes that resulted in the deaths of [ten] people, mostly Muslim Brotherhood members, and injuries to 748 more, according to the Health Ministry.”²³⁹ Troubling, according to HRW, was President Morsi’s characterizing the protesters as paid informants instead of demanding an independent investigation of both events.²⁴⁰ During Morsi’s regime, there were also more

abuses of power).

²³⁵ AMNESTY INT’L, *supra* note 230, at 6.

²³⁶ Despite the coup and the Egyptian authorities’ attacks, the Brotherhood apparently still has attempted to protest peacefully rather than resorting to violence. “In their strategy of confrontation, the MB have tried to resort to peaceful demonstrations and protests as a way of showing not only to Egyptians but to the international community that they are engaging in the reasonable exercise of the right to freedom of expression and assembly.” Bassiouni, *Egypt Update Number 25*, *supra* note 209. Some have pointed to the “trauma” induced by the Morsi regime and have criticized Morsi for trying “to change Egyptian identity.”²⁴² Others have objected to President Morsi asserting ever increasing power while he “mismanaged the country, g[ave] a monopoly on decision making to the Muslim Brotherhood and his Islamist allies, and encroached on the judiciary.”²⁴³ Still others stressed his calling a referendum on a constitution that “undermines basic freedoms and violates universal rights.”²⁴⁴ Furthermore, some believe that the Muslim Brotherhood merely tagged on to the Arab Spring, and, therefore, was an undeserving recipient of the political opening that the young secularists responsible for the Arab Spring made possible.²⁴⁵

On the other hand, the Muslim Brotherhood generally had kept its pledge to renounce violence.²⁴⁶ As Avi Shlaim observed, Morsi

“represents the moderate and modernist core of the Muslim Brotherhood that renounced violence decades ago.”²⁴⁷ Compared to other countries that underwent a military overthrow of democratic rule, the Morsi regime’s abuses were far from extreme: “[The Morsi regime’s] excesses fell well short of those of [Venezuela’s Hugo] Chavez, or Chile’s Salvador Allende; unlike [Thailand’s] Shinawatra or [Argentina’s] Perón, Morsi did not set up militias or establish death squads. Although his government failed to compromise with opponents and sought to concentrate its power, it made only modest attempts to impose its Islamic ideology on the country and did not seek to alter Egypt’s capitalist economy, which was slowly sinking but not imploding. It preserved crucial foreign relationships with the United States and Israel.”²⁴⁸

Seeing their Arab Spring revolution exploited by the Muslim Brotherhood, the secularists, however, went back to Tahrir Square to protest Morsi’s and the Brotherhood’s actions.²⁴⁹ The protests extended beyond the square to most parts of the country. The still failing Egyptian economy added to the Muslim Brotherhood’s unpopularity.²⁵⁰ Massive demonstrations, like those resulting in Mubarak’s overthrow, were now aimed at Morsi and the Brotherhood. The opposition movement claimed they had obtained twenty-two million signatures on a petition for Morsi to step down.²⁵¹ The Egyptian military, which had been part of the Security

Forces that had put down the Brotherhood for decades, were likewise uncomfortable with the Brotherhood's rise to power. There is substantial evidence that the Egyptian military surreptitiously provided money and other resources to the anti-Morsi protests preceding the military overthrow and played a significant role in orchestrating the anti-Morsi demonstrations.²⁵²

Furthermore, the military had vital economic interests at stake. Unlike the military branch in most other countries, Egypt's military also ran many major money-making enterprises in the country, holding from five to sixty percent of the country's economy.²⁵³ After Morsi's election, there had been calls for the military to be divested of these enterprises.²⁵⁴ The Morsi regime had been planning to develop an area along the Suez Canal, but had cut out the military from any economic participation in the over eight billion dollar project, the biggest in Egypt for the next twenty

F. The Military Coup, the Military's Repression of the Muslim Brotherhood, and the U.S. Response

By July 2013, the Egyptian military under General Abdul Fattah el-Sisi decided to carry out a coup d'état against the first democratically elected and the first civilian president of Egypt.²⁵⁷ The available evidence suggests that, at best, the Obama administration made a half-hearted stance against the military's coup.²⁵⁸ El-Sisi says the United States ambassador asked him "to hold off 'for a day or two' before ousting" Muhammad Morsi, but claims he "had rebuffed the request."²⁵⁹ The secularists likewise supported the coup, some calling it a legitimate impeachment of an unpopular ruler.²⁶⁰

legality because Morsi had been duly elected—a position which the United States supported at the time; namely, that he was the duly elected president of Egypt. But millions took to the streets on June 30, 2013 against the MB, and there was also a petition prepared by the group Tamarrud (the group spearheading calls for the June 30 demonstrations) allegedly signed by 22 million people for his removal from office. There was no constitution in effect, though the 2012 Constitution had been approved by a public referendum, but it never went into effect. From the outset of the coup, the military brutally put down protests and demonstrations of the Muslim Brotherhood.²⁷⁹ Aside from arresting the Brotherhood's top leadership and rank and file who openly objected to Morsi's overthrow, the Security Forces five days later fired on hundreds who took part in a protest against Egypt's military coup.²⁸⁰ Over fifty people were killed and more than 400 injured.²⁸¹ Less than two weeks later, the Security Forces killed seventy-four people, shooting many in "the head or the chest," suggesting an intent not to disperse peacefully but to kill.²⁸²

IV. International Law As a Guide to Counter-Terrorism Policy and Practice

A. The Emerging Norm Prohibiting Military Overthrow of Democratic Governments

The international community has increasingly condemned military coups d'état against democratic governments.³⁰¹ There is an evolving norm of customary international law rendering such overthrows unlawful.³⁰² Some argue that no state responsibility arises from a coup, so the practical effect of the international community's declaration of illegality is more political and moral than firmly based on legal principle.³⁰³ On the other hand, often a large number of states have refused to recognize the military

<http://www.nytimes.com/2014/06/04/world/middleeast/egypt-sisi-wins-with-97-percent.html> [<http://perma.cc/D6WX-3F5Z>].

³⁰⁰ *Id.* (“[T]urnout was about 47 percent of eligible voters, far short of what he had sought to prove he had a mandate to lead and less than the 52 percent who voted in the 2012 election won by Muhammad Morsi, whom Mr. Sisi overthrew last year.”). El-Sisi received 97 percent of the vote. *Id.*

Fox, *Internationalizing National Politics: Lessons for International Organizations*, 13 WIDENER L. REV. 265, 265 (2007) (“While human rights regimes had long discredited the idea that the international community should never be involved in matters of national politics, the move toward democratic legitimacy took intervention a giant step further.”). On the other hand, the military overthrowing a dictatorial government may be legitimate. Ozan O. Varol, *The Democratic Coup d'État*, 53 HARV. INT'L L.J. 291 (2012).

government coming into power.³⁰⁴ Sometimes, the United Nations has refused to give to the coup regime that state's seat if the United Nations, has condemned the overthrow of a democratically elected leader³⁰⁵ and even has taken direct legal action against the coup government.³⁰⁶ Sometimes, other international organizations similarly opposed such coups.³⁰⁷ Such refusals have both political and legal consequences. For example, a United States' statute prohibits the United States from providing any aid to a country "whose duly elected head of government is deposed by military coup or decree."³⁰⁸

³⁰⁴ See, e.g., M.J. Peterson, *Recognition of Governments Should Not Be Abolished*, 77 AM. J. The U.N. If coups against democratically elected leaders can ever be justified, the overthrow of President Manuel Zelaya of Honduras was far more defensible than that of President Morsi. President Zelaya's overthrow, however, was widely condemned by the international community and by international organizations.³¹⁶ There, the Honduran President sought to hold a referendum to gain the people's approval to establish a constituent assembly to rewrite the Honduran constitution to extend his term of office. A Honduran court issued an injunction against President Zelaya, ordering him to stop the referendum's holding, reasoning that such a referendum violated the Honduran constitution.³¹⁷ President Zelaya ignored the order and a later Honduran Supreme Court order to the same effect.³¹⁸ The Honduran Supreme Court then ordered Zelaya's arrest.³¹⁹ The military stormed the President's palace at dawn, took him to the airport and put him on a plane to Costa Rica.³²⁰ Apparently, the Honduran Supreme Court and Congress feared that Zelaya was trying to establish a Hugo-Chavez-type regime in Honduras.³²¹

The Honduran Constitution (like the Egyptian Constitution then in effect) lacked a provision for impeaching the president.³²² The Honduran coup had the bipartisan support of the Honduran Congress, including Zelaya's own Liberal Party, the presidential candidates of Zelaya's party, and the opposition national party.³²³

Furthermore, the coup had the support “of the supreme court, the office of the attorney general, the supreme electoral tribunal, . . . the national human rights ombudsman[,] . . . the senior hierarchy of the Catholic Church . . . as well as Protestant evangelical groups.”³²⁴ Had there been a provision for impeachment in the Honduran Constitution, it is likely that Zelaya would have been impeached.

Nevertheless, the ousting of President Zelaya was condemned by the U.N. General Assembly, by the Organization of American States, by the Inter-American Commission of Human Rights, by Latin American and other countries, and by the United States.³²⁵ The World Bank indicated it was suspending a \$400 million loan to Honduras.³²⁶ The European Union, the Inter-American Development Bank, the Central American Integration System, and the Central American Bank of Economic Integration also sanctioned Honduras.³²⁷

Despite Zelaya’s unconstitutional efforts to hold the referendum and extend his power in office, the international community viewed his ouster as an illegal coup d’état. Morsi’s attempts to rule by decree until the proposed Egyptian constitution was approved appear certainly no worse than what Zelaya was trying to accomplish.³²⁸ Given the extreme decision of a Mubarak-appointed

court to dissolve the Islamic-dominated lower house of parliament,³²⁹ Morsi's decision to refuse to follow judicial orders was understandable if neither legal nor wise. Given the composition of the Egyptian parliament, it is far less likely that Morsi would have been impeached had there been a constitutional impeachment provision available (and had the lower house of parliament not been dissolved). Unlike Zelaya's party, the Muslim Brotherhood certainly did not approve the coup.³³⁰ In addition, the constitution was not suspended in Honduras, but it was suspended in Egypt.³³¹ "In Egypt, it's crystal clear that the military holds power. In the case of Honduras, the military never really had power, but rather was acting on behalf of the Supreme Court, Congress, and leaders within Mr. Zelaya's own Liberal Party."³³² Lastly, the Honduran coup aftermath pales in comparison with the Egyptian military coup leaders' violent repression of the Muslim Brotherhood, banning the organization and imprisoning all its leadership, and the harsh penalties it has visited on those Brotherhood members who have had blatantly unfair, summary mass trials.³³³

The international community, however, generally failed to condemn the Egyptian military coup itself.³³⁴ The evidence of the military's aiding and abetting the protests against Morsi did not come out until months after the coup, and the delay may have dampened any outcry.³³⁵ Ironically, arresting rather than letting Morsi leave the country may also have contributed to the softer protest against the coup. (Both Aristede and Zelaya addressed the U.N. General Assembly following their coups, successfully urging the Assembly to condemn each of their military overthrows.) One hopes that the lack of protest did not stem from bias in the West against fundamentalist ideology or from distorted generalizations of Muslims, based on terrorist activity by a small fragment of the Muslim population.³³⁶ Muslim fundamentalists, whom the Muslim Brotherhood represents, certainly do not enjoy unanimous approval in the Muslim world. But assuming we accept that customary international law against the military overthrow of democratically elected governments is emerging, it is hard to deny that the Egyptian military violated that norm.

*B. Human Rights Law and the Aftermath of the Military
Coup*

Aside from the emerging illegality of overthrowing a democratic government, the military in carrying out a coup and in solidifying their power usually violates international human rights law and sometimes, if a civil war breaks out, international humanitarian law as well.³³⁷ As noted above, the Egyptian military regime has engaged in repeated, serious human rights violations since deposing President Morsi.³³⁸ In this period, the Egyptian government has continuously violated customary international law and numerous provisions of the foundational human rights treaty, the International Covenant on Civil and Political Rights, (“ICCPR”).³³⁹ Under the ICCPR, each state party is required to respect the rights of “all individuals” without “distinction of any kind, such as . . . religion or other opinion.”³⁴⁰ The ICCPR also guarantees each citizen the right to “take part in the conduct of public affairs . . . through freely chosen representatives.”³⁴¹ The Egyptian military coup itself arguably violates the latter article. By overthrowing Morsi and by dissolving the Parliament, the military (and an Egyptian court) directly interfered with Muslim Brotherhood members’ right to “take part in the conduct of public affairs . . . through freely chosen representatives.”³⁴² Banning the Muslim Brotherhood altogether on frivolous grounds unquestionably amounted to discrimination on the basis of

“religion, political or other opinion”³⁴³ and again directly interfered with the right of Muslim Brotherhood members to participate in government “through freely chosen representatives.”³⁴⁴

The ICCPR also requires each state party to guarantee the freedoms of expression, of assembly, and of association.³⁴⁵ By imprisoning and convicting journalists for reporting events that the government does not like exposed, the Egyptian government again has violated its obligation to respect freedom of expression.³⁴⁶ The government’s repression of peaceful demonstrations constitutes an egregious violation of both the freedom of assembly and of association.

Under Article 6 of the ICCPR, the Egyptian authorities are expressly prohibited from arbitrarily taking the life of their own nationals or anyone else.³⁴⁷ Law enforcement personnel may use deadly force only when their lives or others’ are in imminent danger of death or serious bodily harm.³⁴⁸ By aiming at the head and chest of demonstrators and killing hundreds of them, the Egyptian Security Forces engaged in “arbitrary” taking of life in violation of article 6 of the ICCPR and of the customary law obligation to minimize the use of deadly force.³⁴⁹

law, individuals subject to the death penalty are entitled to a fair trial.³⁵⁰ Holding summary mass trials in capital cases makes a mockery of this obligation.³⁵¹ Egypt's campaign of terror against the Muslim Brotherhood and its arrest of thousands without reasonable cause and subsequently failing to provide them a fair trial likewise violate both the ICCPR and customary international law.³⁵²

Furthermore, Article 7 of the ICCPR prohibits torture and cruel, inhuman and degrading treatment.³⁵³ Like the right to life, this obligation is strict.³⁵⁴ States may not derogate from it even in cases of public emergency.³⁵⁵ By increasing the operation of its already busy torture chambers,³⁵⁶ Egypt has regularly violated Article 7, an equivalent bar under the Torture Convention, and peremptory

norms of customary international law.³⁵⁷

C. International Law, Colonization, Annexation, Discrimination, and the West

Aside from the illegality of the coup and widespread international human rights violations perpetrated by the Egyptian military, the West's 200 year encounter with Egypt would now violate fundamental principles of international law. Having experienced the horror of two world wars, the framers of the U.N. Charter outlawed the use or threatened use of armed force except in self-defense or under U.N. Security Council authorization: "All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any other manner inconsistent with the Purposes of the United Nations."³⁵⁸

The most important world treaty with 193 states parties, the U.N. Charter thus prohibits aggressive warfare.³⁵⁹ While not abolishing colonies as such, the Charter makes it very hard for

³⁵⁷ See Comm. Against Torture, Conclusions and Recommendations of the Committee Against Torture: Egypt on its 29th Sess., Dec. 23, 2002, U.N. Doc. CAT/C/CR/29/4 ("Express[ing] particular concern at the widespread evidence of torture and ill-treatment in administrative premises under the control of the State Security Investigation Department.").

³⁵⁷ The civil and political rights set forth in the Universal Declaration of Human Rights (UDHR) are generally considered to have crystallized into customary international law. See *Filartiga v. Pena-Irala*, 630 F.2d 876, 881–82 (2d Cir. 1980); UDHR, *supra* note 352, art. 3 ("Everyone has the right to life, liberty and security of person."); *id.* art. 5 ("No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment."); *id.* art. 9 ("No one shall be subjected to arbitrary arrest, detention or exile."); *id.* art. 11 ("[T]he right to be presumed innocent until proved guilty according to law in a public trial at which he [the accused] has had all the guarantees necessary for his defence."); *id.* art. 19 ("Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers."); *id.* art. 20 ("(1) Everyone has the right to freedom of peaceful assembly and association. (2) No one may be compelled to belong to an association.").

³⁵⁸ U.N. Charter art. 2, ¶ 4. Article 51 of the Charter permits the use of proportional force in the case of self-defense. See *id.* art. 51. Chapter VII of the U.N. Charter authorizes the U.N. Security Council to call on members to use armed force in cases where there is a "threat to the peace." See *id.* arts. 39, 42 (authorizing U.N. Security Council to act).

³⁵⁹ The widely accepted U.N. General Assembly Resolution on Aggression fleshes out the meaning of article 2(4) of the Charter and includes, among others, invasion or attack, bombardment, blockade, and use of irregular or proxy forces. See G.A. Res. 3314 (XXIX), Definition of Aggression art. 3 (Dec. 14, 1974).

powerful states to legally establish new colonies.³⁶⁰ Although the Charter has not stopped warfare, with a few significant exceptions,³⁶¹ it has stopped more powerful states from annexing territory of less powerful states. When combined with the ICCPR and International Covenant on Economic, Social and Cultural Rights (“ESCR”), both of which expressly recognize the right of self-determination, the U.N. Charter forbids acquisition of new colonies.³⁶² The Charter also established a trustee system to encourage, more effectively than the League of Nations mandate system, colony-holding states to relinquish their long-held colonies.³⁶³

³⁶⁰ The legal regime before the U.N. Charter endorsed colonization. For example, especially in the nineteenth century, “[g]iven the military weakness of the non-European states, and the absence of any legal limitations on a state’s ability to commence a war, it was inevitable that European empires would expand by the conquest of large parts of Asia and Africa.” ANTONY ANGHIE, *IMPERIALISM, SOVEREIGNTY AND THE MAKING OF INTERNATIONAL LAW* 83 (2004); see also Antony Anghie, *Finding the Peripheries: Sovereignty and Colonialism in Nineteenth-Century International Law*, 40 HARV. INT’L L.J. 1, 50 n.175 (1999) (“Conquest seems to have been officially outlawed in contemporary international law as a means of acquiring title to territory . . .”).

³⁶¹ China’s conquering and annexing Tibet, and Russia’s annexing Crimea last year are two of the starkest examples of illegal annexations. See, e.g., Robert D. Sloane, *The Changing Face of Recognition in International Law: A Case Study of Tibet*, 16 EMORY INT’L L. REV. 107, 131 (2002); Gaetano Pentassuglia, *Putin Should Know That Crimea Is Not Kosovo When It Comes to Self-Determination*, CONVERSATION (Mar. 31, 2014), <http://theconversation.com/putin-should-know-that-crimea-is-not-kosovo-when-it-comes-to-self-determination-24916> [<http://perma.cc/QN2Z-N39N>]. Russia has argued, among other things, that the doctrine of self-determination justified the annexation of Crimea, an argument rarely accepted in the case of so-called external self-determination. See *id.* (reporting Putin arguing that self-determination justified the annexation). Cf. Shahrough Akhavi, *Muslim Perspectives on the Invasion of Iraq*, in ENEMY COMBATANTS, TERRORISM, AND ARMED CONFLICT LAW: A GUIDE TO THE ISSUES 37, 41 (David K. Linnan ed., 2008) (discussing the Islamic world’s negative perception of the invasion of Iraq as an unjustified external intervention).

³⁶² See ICCPR, *supra* note 339 (“1. All peoples have the right of self-determination. By virtue of that right they freely determine their political status and freely pursue their economic, social and cultural development 3. The States Parties to the present Covenant, including those having responsibility for the administration of Non-Self-Governing and Trust Territories, shall promote the realization of the right of self-determination, and shall respect that right, in conformity with the provisions of the Charter of the United Nations.” (emphasis added)); G.A. Had it been in force at the time, the U.N. Charter, for example would have prohibited Napoleon from conquering Egypt in 1798, would probably have prohibited Muhammad Ali from taking over Egypt in 1801 and 1807, and would probably have prohibited England from colonizing Egypt in 1882. The Charter did prohibit the use of force to retake the Suez Canal in 1956.³⁶⁴ The Egyptian encounter with the West produced an unhealthy alchemy, contributing to the growth of authoritarian Egyptian regimes, to the conflict between Muslim secularists and Muslim fundamentalists, and to the creation of rebels of different ideological and religious bents, striving to throw off the colonial yoke and the repressive regimes which developed in the colonial governments' place.

International law does not fully provide an answer to Egypt's troubles or to the West's and Russia's struggle with Islamic terrorism. International law, however, can help policy makers better understand the forces driving Islamic terrorism and guide the West, in general, and the United States in particular towards more effective and less violent counter-terrorism policies and practices. Under international law, States are responsible only for their acts that were illegal at the time the state committed them. Absent express agreement to the contrary, international law does not apply retrospectively. The International Law Commission's draft articles on state responsibility so provide, "An act of a State does not constitute a breach of an international obligation unless the State is bound by the obligation in question *at the time the act occurs*."³⁶⁵ Called the doctrine on intertemporal law, this principle applies even to acts that subsequently have become proscribed under a peremptory norm of international law.³⁶⁶ The judge in the *Island of Palmas* arbitration explained, "A juridical fact must be appreciated in light of the law contemporary with it *and not the law in force at*

Board of Education* in 1954 declared the doctrine unconstitutional.³⁶⁹ Likewise, the pain, humiliation, and resentment engendered by conquest, colonization, and accompanying racial discrimination³⁷⁰ had been just as sharply felt by the people experiencing these practices before the international community formally outlawed them.³⁷¹

³⁷¹ For historical reasons, the Islamic world did not embrace the scientific method, capitalism, and the industrial revolution. See Hillel Ofek, *Why the Arabic World Turned Away from Science*, THE NEW ATLANTIS 3, 13–15 (2011). The West did embrace all these things and became both economically and militarily more powerful. *Id.* at 18. In the fifteenth and sixteenth centuries, the Ottoman Empire was the world's superpower. It thus must have been particularly humiliating to have been outdone by the Europeans, which had formerly been second rate powers. *Id.* That is how American auto manufacturers must have felt when the Japanese began to make better cars than Detroit and dominate the American market. It must have been like many Americans might feel if Mexico were ever to invade and conquer the United States, take back Texas, New Mexico, Arizona, and California and subject the rest of the United States to Mexican rule.

Although under no legal obligation to make reparation in such circumstances, states may do so. “[A] state may agree to compensate for damage caused as a result of conduct which was not a breach of any international obligation at the time it was committed.”³⁷² Although international law prohibiting racial and nationality discrimination was not clearly recognized until after World War II,³⁷³ the United States compensated Japanese Americans and Japanese nationals who were detained and held in internment camps during that conflict.³⁷⁴ Again largely on moral grounds, the United States has compensated foreign nationals in other situations in which international law did not render the United States legally responsible for the wrong.³⁷⁵ Other states have done

³⁷² CRAWFORD, *supra* 365, at 132–33 (quoting Commentaries). The rule of intertemporal law likewise applies to states and religious organizations that discriminated against Jews for over two millennia. One would imagine, however, that religious organizations, if not states, would make reparation as a moral duty. The reparations movement has had some success in obtaining restitution and other settlement for Holocaust victims, but even by 1939, war crimes and genocide were implicitly recognized as violations of international law, so there really is no retroactivity problem.

³⁷³ The U.N. Charter, not open for signature until 1945, provides that “United Nations shall promote: . . . universal respect for, and observance of, human rights and fundamental freedoms for all *without distinction as to race, sex, language, or religion*” and that “[a]ll members shall pledge themselves to take joint and separate action” to achieve the same. See U.N. Charter arts. 55, 56 (emphasis added). The seminal California Supreme Court case of *Sei Fujii v. State*, implicitly concluded that the “promote” and “pledge” language was not sufficiently definite to create legally binding “rules of law.” 38 Cal. 2d 719, 722 (1952) (noting that the language of the U.N. charter in article 55 was too vague to be binding). The International Court of Justice, however, did conclude that this language was strong enough to render illegal South Africa’s then system of apartheid. See *Legal Consequences for States of the Continued Presence of South Africa in Namibia (South West Africa)*, Advisory Opinion, 1971 I.C.J. 78, ¶ 131 (June 21) (concluding the government policy of discrimination in South Africa violated the language of the U.N. Charter). The anti-discrimination provisions of The Universal Declaration of Human Rights, passed without dissent, by the U.N. General Assembly in 1948, did not, however, crystallize into custom until sometime later.

³⁷⁵ Most notably, United States has compensated civilians who have suffered from American military operations in wartime in Afghanistan, Iraq, and other theatres even absent any showing that the United States was legally responsible. See AMSTERDAM INTERNATIONAL LAW CLINIC, MONETARY PAYMENTS FOR CIVILIAN HARM IN INTERNATIONAL AND NATIONAL PRACTICE 13–16 (2013), <http://www.uva.nl/binaries/content/assets/subsites/amsterdam-international-law-clinic/monetary-payments-report.pdf> [<http://perma.cc/ZE3Q-39DN>]. so as well.³⁷⁶ For example, New Zealand set up a program “to address the wrongs committed by the British government during its colonial rule against the Maori during the late 1800s.”³⁷⁷ Thus in dealing with such wrongs, for most claimants, “reparation is a *moral issue* involving a formal acknowledgement of historical wrong, recognition of continuing injury, and commitment to redress.”³⁷⁸

Since the end of World War II, the international community has outlawed state conquest, colonization and systematic racial discrimination.³⁷⁹ Should the international community now ignore

V. United States Flawed Response to the Coup d'État

By essentially ratifying, if not initially supporting the Egyptian military's coup d'état, the United States falls into the same narrative that probably led to the September 11 attacks.³⁸¹ The West's exploiting Arab and Muslim countries by colonizing them demonstrates at the very least the callous indifference of the West to the plight of Arab and Muslim peoples. The United States has shown indifference if not outright hostility to emerging democratic institutions in the Islamic world. By supporting authoritarian rulers from the Shah of Iran, to Saddam Hussein, to Hosni Mubarak, to Saudi Arabia's House of Saud, to the draconian heads of the tiny oil emirates, the United States has implicitly helped these regimes to smother the possible emergence of democratic movements in their countries.³⁸² As observed above, the United States brought about the coup that deposed the democratically-elected Prime Minister of Iran in 1953.³⁸³ The United States supported the Algerian military's coup on the eve of elections that the Muslim Brotherhood candidates almost certainly would have won in 1991.³⁸⁴

Furthermore, the United States did little to advance respect for democratic rule in Egypt while its client Mubarak for nearly three decades ruthlessly dealt with Brotherhood members and Brotherhood candidates for office.³⁸⁵ Geopolitical interests in oil, in “stability,” in preventing communism were made far higher priorities than fostering the fundamental human rights for the people living in this region.³⁸⁶

United States’ interests in having a strong relationship with Egypt are no less critical today. While the Suez Canal may have been colonial Britain’s “highway to India,” it is now the U.S. warships’ highway to Iraq, Saudi Arabia, Yemen, Pakistan, Afghanistan, Iran, and Somalia.³⁸⁷ These countries are all critical to current United States armed conflicts or to the so-called war against terrorism, or both.³⁸⁸ Egypt allows United States warships to cut the

American foreign policy in the Bush administration. American national interest was defined as being well-served in terms of combating Islamic terrorist extremism if the region’s authoritarian and anti-democratic regimes were expunged and substituted with moderate pro-western regimes. The difficulty with regime change and transition in the region, however, has been that electorates are opting for Islamist parties and movements in the process. These movements, *albeit mostly moderate*, articulate a concept of political reform from within an alternate framework to the secular West. Convergence is unlikely, but accommodation is possible.” (emphasis added).

Lastly, Egypt is one of only two Arab countries to have signed a peace treaty with Israel, and, as the most populous Arab state and a next-door neighbor, is critical to Israeli security.³⁹⁰

The United States' tepidly protesting the planned coup d'état and ultimately ratifying it can be explained in part by these interests. Immediately after the coup on July 3, 2013, President Obama refused to characterize the military takeover as a "coup,"³⁹¹ and refused to stop the \$1.5 billion in aid to Egypt as federal law would otherwise have required.³⁹² His response to the military overthrowing Egypt's first freely and fairly elected president was to suspend delivery of four F-16 fighter jets.³⁹³ Even that suspension was reversed less than ten days after the coup.³⁹⁴ Only months later did the Obama administration put a "temporary freeze" on some armaments scheduled for delivery to Egypt.³⁹⁵ The administration

leaders including Muhammed Ali, Gamal Abdul Nasser, Anwar Al-Sadat, Hosni Mubarak, and Abdul Fattah el-Sisi. That colonization, its aftermath, and Kemal Ataturk's related aggressive secularism gave rise to an Islamic fundamentalist reaction, creating Hasan al Banna, his Muslim Brotherhood and his progeny: Sayyid al-Qutb, Ayman al-Zawahiri, and Osama bin Laden, and their movements, including al-Qaeda and arguably ISIS.⁴⁰⁹ Consequently, we in the West have to be particularly sensitive to policies and practices that perpetuate this vicious cycle.

Unfortunately, the United States began to take on the face of a Middle East colonial power at the end of World War II. U.S. policy concentrated on continuing the supply of oil and containing communism. With a few exceptions,⁴¹⁰ the United States displayed little concern for the human rights of Arab and Muslim people or for the growth of democratic movements and institutions in the Arab and Islamic worlds.⁴¹¹

Ireland was Britain's first colony. The Irish suffered discrimination at the hands of the British and British settlers for centuries. The Irish have a saying, "The British never remember, the Irish never forget."⁴¹² Americans tend to forget our supporting repressive regimes in the Middle East for decades, our thwarting democratic movements in that region, and in particular our giving

⁴⁰⁹ ISIS does trace itself to Muhammed ibn Abd ab-Wahhab, and his "austere interpretation of Islam," known as Wahhabism, coming from 18th century Saudi Arabia. David D. Kirkpatrick, *Extremist Group's Harsh Brand of Islam Has Roots in Austere Saudi Creed*, N.Y. The British support of Abdul Aziz ibn-Saud during World War I, however, helped him emerge as the ruler of Saudi Arabia, and with him, Wahhabism. Saudi Arabia's oil wealth has helped Wahhabism spread around the globe. ANDERSON, *supra* note 182 (describing Abdul Aziz ibn-Saud's rise to power).

Mubarak billions of dollars while he ruled Egypt by decree and routinely tortured political opponents including Muslim Brotherhood members. Arabs and Muslims throughout the world generally never forget these things. Certainly, they are not forgotten by Islamic fundamentalists.⁴¹³

Because the West and Russia have exploited Muslim peoples and contributed to the rise both of autocratic leaders and extreme fundamentalists, the West and Russia have a moral, if not strictly legal obligation not only to help Muslim countries economically, but also to further a peaceful and democratic resolution of the issues that such Western and Russian policies and practices brought about. Achieving this latter objective requires greater resort to tough diplomacy than to military force. Ratifying the Egyptian military coup constitutes a failure of the United States and the West in general to take a peaceful, non-violent path towards resolving the challenge of Islamic terrorism. Denying Egypt's Islamic fundamentalists their fairly won presidential election and parliamentary elections⁴¹⁴ feeds into the propaganda of the extremists, silences moderates who wish to follow the rule of law, and strengthens those espousing the hardest line toward the West.⁴¹⁵ By implicitly endorsing the Egyptian military's repression of generally peaceful protesters and political opponents, we also make more likely revenge attacks against the 'far enemy'—the United States—by jihadists outraged by the Egyptian military's onslaught

⁴¹³ Perhaps not coincidentally, the West and Russia have been responsible for more than millennia-old discrimination against Jews, ultimately resulting in the Holocaust. Under the same reasoning, the West and Russia bear a moral, if not legal responsibility for resolving the Israeli-Palestinian crisis.

⁴¹⁴ See Bassiouni, *Egypt Update Number 16*, *supra* note 223 (criticizing the election law as being biased in favor of political parties' candidates). *But see* Aziz, *supra* note 198, at 4 (criticizing the election laws but noting that "Egyptians viewed with suspicion the Supreme Constitutional Court's June 12, 2012, ruling calling for the dissolution of a Muslim dominated parliament").

against the Muslim Brotherhood.⁴¹⁶ Furthermore, such endorsement of the coup and its aftermath makes President Obama's call for democracy and for Muslims to stop ISIS and al-Qaeda extremists⁴¹⁷ appear hypocritical.⁴¹⁸

Admittedly, the Egyptian case has been challenging. The Muslim Brotherhood is an illiberal organization which espouses many views most in the West abhor, advocating a strict interpretation of sharia law, practicing *de jure* discrimination against women and the LGBT community,⁴¹⁹ preaching intolerance of other religions, and showing hostility to our ally, Israel.⁴²⁰ Morsi

⁴¹⁸ President Obama's recent call for "more democracy" as the chief counter to terrorism is unquestionably correct, but his call appears hypocritical given the actions of the United States. See President Barack Obama, Remarks in Closing of the Summit on Countering Violent Extremism (Feb. 18, 2015), <https://www.whitehouse.gov/the-press-office/2015/02/18/remarks-president-closing-summit-countering-violent-extremism> [<https://perma.cc/XHH7-LXVK>] ("When governments oppress their people, deny human rights, stifle dissent or marginalize ethnic and religious groups, favor certain religious groups over others, it sows the seeds of extremism and violence."). But conditions for the LGBT community may not be that much better under the military. See Patrick Kingsley, *Egypt Jails Eight Men After "Gay Marriage" Ceremony on Nile*, GUARDIAN (Nov. 3, 2014), http://www.theguardian.com/world/2014/nov/03/egypt-jails-eight-men-gay-marriage-ceremony-nile?CMP=ema_565 [<http://perma.cc/SFB6-25CE>] (reporting on Egypt's treatment of LGBT peoples); *ICJ Welcomes General Assembly's Third Committee's Adoption of Resolution on Extrajudicial, Summary or Arbitrary Executions*, INT'L COMMISSION JURISTS (Nov. 21, 2014), <http://www.icj.org/icj-welcomes-general-assemblys-third-committees-adoption-of-resolution-on-extrajudicial-summary-or-arbitrary-executions/> [<http://perma.cc/L8UM-BPYQ>] (noting that the GA resolution "urges state to investigate killings based on discriminatory grounds including killings that target people based on their sexual orientation or gender identity" and that Egypt proposed an amendment to remove the language referring to LGBT persons).

and his Parliament were making a grab for power. There were massive protests against his rule by the secularists with whom the West understandably has greater sympathy.

Yet implicitly backing the military coup undermined one of the most fundamental values of all: the rule of law and the peaceful electoral process, the minimum requirements for a legitimate democracy. It teaches Islamic fundamentalists that they may achieve their aims only by violence, not by the ballot box.⁴²¹ The United States' failure reflects a fundamental misunderstanding of how historical, political, legal, and religious forces created the perfect storm that contributed both to 9/11 and to the current struggle with Islamic terrorism.

Granted, the United States has critical foreign policy interests in maintaining a close relationship with Egypt. On the other hand, the United States has a critical foreign policy interest in quelling international terrorism.⁴²² Propping up dictatorial regimes in the Middle East closes off peaceful avenues of protest, forcing people wishing to change the regime's policies to go underground, to join or support what the regime will almost certainly label terrorist organizations. By discriminating against Muslim fundamentalists and implicitly ratifying the illegal use of force against them, United States "play[s] into the hands of the extremists,"⁴²³ ultimately compelling the United States to resort to military counter-terrorism.

At a minimum the Obama administration should have cut off military aid,⁴²⁴ sought a U.N. Security Council Resolution

had adhered to the Accords).

⁴²¹ See Mekay, *supra* note 407 ("Al-Qaeda's ideology of violence as the only means of change has now received a new lease of life."); Revkin, *supra* note 415 ("Egypt has seen a dramatic increase in domestic terrorism with over 300 documented attacks since July 2013."); TAHIR INST. FOR MIDDLE E. POLICY, *supra* note 400 (noting increased terrorist attacks in Egypt).

⁴²² If Egypt is the keystone to peace in the Middle East, and if we assume Egypt will turn away from the United States without the annual \$1.3 billion in military aid, which the United States has provided for more than thirty years, not to mention providing military equipment and training for Egyptian officers in that time, then those payments themselves are a thin reed on which to base so-called Middle East peace and other critical interests.

⁴²³ Revkin, *supra* note 415 (permitting jihadist to demonstrate that violence is the only path).

⁴²⁴ On the other hand, the administration might have increased earmarked economic aid, given the dire state of the Egyptian economy, consistent with the purpose of the Special International Security Act of 1979 "in order to promote the economic stability and development of [Egypt] and to support the peace process in the Middle East." 22 U.S.C.

condemning the Egyptian government's use of excessive force against those protesting the takeover, and threatened both a travel ban on the coup's leaders and a world boycott of the sale to Egypt of military equipment and supplies.

Despite the ever increasing polarized politics here, Americans have deep respect for democracy, the peaceful electoral process, the right to protest, to free speech, to fair trial and to other fundamental human rights. Neither the American public nor the American court system would ever countenance some judges' dissolution of the United States Congress, or of the authorities' shooting to kill innocent protesters, torturing political opponents, banning the party that won the last presidential election, and imprisoning all its leaders, not to mention overthrowing the President, throwing him in jail in a desert prison, and charging him with a capital offense.

Our best counter-terrorism policy and practice is to foster democratic institutions, the rule of law, and international human rights in the Arab and Muslim worlds.⁴²⁵ Implicitly ratifying the coup and the Egyptian military's extreme violence in putting down protest eviscerates that policy.⁴²⁶ If we are serious about reducing

In addition, such economic aid should also be sufficiently high (a) to pay for the privilege of allowing U.S. warships to cut the line of ships waiting to pass through the Suez Canal and (b) to comply with U.S. obligations under the Camp David accords. *See Whither American Aid to Egypt, supra*. One could argue that given the \$12 billion that Saudi Arabia, U.A.E., and Kuwait gave Egypt, cutting off aid would not change the Egyptian leadership's policies. *Id.* On the other hand, such a cut off in military aid would unambiguously send a message of support for democratic institutions throughout the Muslim world.

the threat of Islamic terrorism, we, with our European and other allies, have to stop applying a double standard to Arabs and Muslims, including their fundamentalists, and, instead, have to recognize and affirmatively address the suffering all peoples in the Middle East have experienced.
